

## C5 `Launching start-ups on line`

### **Exchange of students - Turkey. May 2023**

**Participants:** 5 chosen students from each partner school, aged 13-16 and coming from from diverse backgrounds. One of these Ss at least falls into the category described in the above section. Thus, 25 Ss will be attending the meeting altogether. 10 Ts will accompany them-the coordinator and a language or ICT teacher, or other teacher chosen for the international event based on his/her involvement in working with Ss on project related activities and any other criteria relevant in the methodology of selection applied. The host school will also make a similar allocation of Ss – no less than 6 Ss will actively partake in all the events-25 Ss will offer accommodation for guests and several other Ss will help organizing the event.

**During C5 meeting, the hosts will organize a variety of workshops for teaching and working with Ss on designing a basic presentation website. Afterwards, while arranged in mixed groups, Ss are given a business idea which they have to work with for creating a presentation website.**

Through the organization of C5, we aim to:

- To teach Ss how to create a basic presentation website.
- To permit Ss to productively work and collaborate/communicate with their other peers for creating a simple advertising campaign.
- To allow participants to interact with and connect to peers from other cultures and countries, to find out similarities and differences between themselves
- To allow students to make cultural discoveries about Turkey, and about Turkish people`s lifestyle and traditions
- To broaden the cultural knowledge of the participants and to raise awareness of the project's European dimension.
- To encourage Ss to spend time with their peers/host and experience life in the partners` country
- To provide participants with an overview into the Turkish region's economic life and; to enable them to identify opportunities finding prospects for start-ups by conversations and interactions with entrepreneurs.
- To enable host Ss and Ts to improve their organizational and planning skills.
- To improve the communication skills of all participants and to raise the level of their self-confidence in a multicultural environment.

#### **Expected results:**

- 6 presentation websites (1/partner school)
- Interviews with experts and local entrepreneurs.
- Initial/final evaluation papers.
- Participants` feedback sheets.
- Pictures.
- The partner's recorded diary of the entire week.
- Report designed by the host.
- Attendance certificates.
- Observation documents made by the accompanying teachers.
